

To be honest with you... I want to send you a letter which can describe everything about my feeling in this great experience. So, I'll do my best to make it clear.

When I was in Saudi, I strong-willed to go early to Australia and do some nice activities. In fact, I want to go to New Zealand or to some where in Asia. Furthermore I was too worried about my new adventure because I want it to be successful 100%. However, my final decision was staying in gold coast to study English in your collage, so all my plans were terminated. In the first day I had strange feeling about new class, I thought that I've got the wrong decision. Conversely, with the time I love that class. I like this class because of the people that I have met their. My teacher is the most effective factor in this class. With no doubt my partners that I've met their have a segnificant factor as well. I've gained a lot from this class. I can see my improvement in Thursday ILETS test. I can see my progress in writing. I improved a lot. However, I still need a lot to develop my language skills.

Thanks.

I want to send my appreciations to my teacher Janice and my friends. For Janice because she teaches me a lot of thing especially in economics and finance and also in ILETS test. Not only that but you affect my attitudes and expression about anything. I open my mind about a lot of things. (In some points you are my role module) and I am proud of that. I believe in a lot of things that you believed of.

Also I send my thanks and appreciations to my friend. It is so great to have friends from everywhere. I respect and like them all. I am proud to have friend from Ukraine, Belarus, china, New Caledonia, Korea, and Taiwan.

Confess...

I should confess to you. My first confess that I will never forgot you and any knowledge you've provide it to me [you where right when you said it to me... do you remember that day?]. My second confess is ill never forgot my friends all of them because every one of them has got a special way of kindness affect people around them.

My last confess. I feel sad and I feel that I've lost something precious when I left the collage, but I should do it.
